

New OSHA Workplace Injury Reporting Requirement

Mandatory Reporting of Injuries/Illnesses to VOSHA Requirements

1904.39(a)

Basic requirement.

(1) Within eight (8) hours after the death of any employee as a result of a work-related incident, you must report the fatality to the Occupational Safety and Health Administration (OSHA), U.S. Department of Labor.

(2) Within twenty-four (24) hours after the in-patient hospitalization of one or more employees or an employee's amputation or an employee's loss of an eye, as a result of a work-related incident, you must report the in-patient hospitalization, amputation, or loss of an eye to OSHA.

(3) You must report the fatality, in-patient hospitalization, amputation, or loss of an eye using one of the following methods:

(i) By telephone or in person to the OSHA Area Office that is nearest to the site of the incident.

(ii) By telephone to the OSHA toll-free central telephone number, 1-800-321-OSHA (1-800-321-6742).

(iii) By electronic submission using the reporting application located on VOSHA's public Web site at <http://labor.vermont.gov/vosha-injuriesillnesses-report/>

OSHA's revised Hazard Communication requirements as of June 1, 2015

As of June 1, 2015, chemical manufacturers, importers, distributors and employers are required to provide a common approach to classifying chemicals and communicating hazard information on labels and safety data sheets. Chemical manufacturers and importers must provide a label that includes a signal word, [pictogram](#), hazard statement, and precautionary statement for each hazard class and category.

Examples of [label pictograms](#).

Beginning in December, distributors may only ship containers labeled by the chemical manufacturer or importer if the labels meet these requirements.

The June 1 deadline was established when OSHA aligned its [Hazard Communication Standard](#) in 2012 with the global standard for chemical product labeling. The provisions for labeling offer workers better protection from chemical hazards, while also reducing trade barriers and improving productivity for American businesses that regularly handle, store, and use hazardous chemicals. The updated standard also provides cost savings for American businesses that periodically update safety data sheets and labels for chemicals covered under the standard, saving businesses millions of dollars each year.

The new format for [Safety Data Sheets](#) requires 16 specific sections to ensure consistency in presentation of important protection information. For more information, see OSHA's [Hazard Communication webpage](#)."

The 2014 Occupational Employment and Wages (OES) Data is available

Vermont Department of Labor
